PREFACE

When George MacRae and Simon Smith became co-editors of New Testament Abstracts in 1966, succeeding John Collins, it was apparent to them that a cumulative index of the preceding ten volumes was needed. In the ensuing years several people worked at the project, but there was never time enough to carry through to the end. Finally it was determined that the cumulation should include volumes 11-15 as well, and at last we are able to present the results.

A note at the head of each index explains its use. The Scripture index is the work of Robert Wild, and the index of authors is the work of James Dunkly. Daniel Harrington edited the manuscripts and Jane Waldron's typescripts of both indexes. Our thanks to Richard Craner and the rest of the staff at Edwards Brothers of Ann Arbor, who printed and bound the volume.

Costs have not allowed us to include as much as we should have liked; indexes of book reviews, book notices, biographical notes, and authors cited had to be omitted. We regret these omissions, but we do think that the most important items for the majority of users are the two indexes printed here. We should like to acknowledge our debt to those who worked on the project along the way, even though much of that work has not been used here: Peter Fennessy, Fred Hanhisalo, Douglas McDonald, and Simon Smith.

In the future, we intend to publish similar cumulative indexes at ten-year intervals, so that the next should appear soon after the completion of volume 25 (1981). But we should be rash indeed if we committed ourselves (or our successors) to more than that.

INDEX OF PRINCIPAL SCRIPTURE REFERENCES

The numbers following the scriptural texts refer to entries, not pages. Thus 15.234 indicates volume 15, abstract no. 234. The letter r after an abstract number indicates a book review. The abbreviation Exp refers to the experimental issue of NTA (May, 1956).

INDEX OF AUTHORS

This index lists authors of both articles and book reviews. The numbers following the personal names refer to entries, not pages. Thus 15.234 indicates volume 15, abstract no. 234. The letter r after an abstract number indicates a book review. The abbreviation Exp refers to the experimental issue of NTA (May, 1956). *refers to Addenda on last page.
